

A lot has been happening at Impatex this year, particularly with NetFreight and our 'Integrated Customs for Europe' (ICE) software. Below is an update on each development, along with new customers.

OUR EXISTING CUSTOMS MANAGER (CM) SOFTWARE IS BEING REPLACED WITH NETFREIGHT FOR 'INDEPENDENTS' AND ICE FOR MULTI-NATIONAL 'CORPORATES', CUSTOMS BROKERS AND TRADERS

NetFreight

Over 50 new enhancements have been incorporated into the latest release of NetFreight, which is going from strength to strength.

Below are some of the main ones:

- Customs entries without job
- Improvements to Customs
- Comprehensive Permissions
- Milestones & Events
- Audit facility
- WMS with barcoding
- Customisable Track & Trace
- Report Generator
- Direct email from NetFreight
- eFreight (FWB/FHL)
- Improved Courier functions
- Auto post flight notifications
- Improvements to NetTrak

Our 'Integrated Customs for Europe' (ICE) software is already being used for:

- ICS
- EMCS
- NCTS

Now ICE is available for NES, although we are still awaiting a date from HMRC for DEP accreditation, so initially ICE will only be available for non-DEP or air exports not subject to DEP. We hope the DEP facility will be available early next year, along with frontier Imports and ERT's, which also requires accreditation.

Once frontier Customs has been completed, then Duty Management and Customs Processing with Economic Impact (CPEI) will be added to ICE and CM discontinued.

New Customers

- Adrian Freight
- Anshika International
